Dear Fellow Athletic Director,

In February of 2000, I contacted Johnson Machine Works on upgrading our press box. During the upgrading process we went from adding a second level to the old press box to a new three level press box. The third level sky boxes are rented out to the public.

This was the first press box/sky box project for Johnson Machine Works. We had several meetings on the planning, designing and construction. Johnson Machine Works, Jeff and his staff did an excellent job working with the school's support staff, coaches and administrators and took great pride in their work. The press box/sky box was completed on time and done right the first time.

We are very proud of our press box/sky box and we feel we have a great addition to our athletic facilities. If you are looking to build a press box, I highly recommend Johnson Machine Works. Please feel free to contact me on any questions you may have.

Sincerely,

Jeff Bevins, CAA
Chariton High School
