

November 3, 2002

Dear Fellow Athletic Director,

As a Coach and Activities Director for 15 years, I have had the privilege of working with many outstanding organizations. Johnson Machine Works is one company in particular that your school should consider. In upgrading our athletic facilities, Waukee High School made the decision to build a press box/sky box that would serve our school and community for years to come. We choose to work with Johnson Machine Works and we could not be more pleased with the decision.

Johnson Machine Works, Jeff Johnson, and his staff worked closely with us from the early planning stages of the project, to the completion of the job. The quality product, their pride in workmanship, attention to detail, and professionalism in dealing with our school's maintenance staff, coaches and administration was outstanding. They communicated with us throughout construction and finished the facility on schedule. They even added special touches to help personalize the facility.

If your school is looking to build a press box, I strongly recommend Johnson Machine Works. I truly believe your school will benefit from their services.

Sincerely,

Jim Duea
Director of Activities
Waukee High School
